Emergency Information for American Citizens By U.S. Embassy in Rwanda 10 MINUTE READ  
Educational Advising: The EducationUSA Advising Center in Kigali is sponsored by the Public Diplomacy of U.S. Embassy Kigali and serves over 10,000 students per year in a wide range of programs designed to strengthen students' readiness for U.S. higher education, including their application preparations. We are eager to work with U.S. higher education institutions to make it possible for more Rwandan students to enroll in the United States. Please contact the EducationUSA Advisor and refer your Rwandan applicants to us for any assistance that we can provide. EducationUSA Advisor U.S. Embassy Kigali, Rwanda kigali@educationusa.org Phone: (+250) 78-831-3761 We appreciate two copies of your catalogue, viewbook, or other promotional material, if mailed through the diplomatic pouch to: EducationUSA Advisor Public Diplomacy Section U.S. Embassy Kigali 2210 Kigali Place Washington, DC 20521-2210 We welcome recruitment visits to Rwanda and can readily assemble a great audience for your presentations. Come and visit! Rwandan Education System Rwanda operates on a 6-3-3-4 system: Primary School – 6 years Junior Secondary School (Ordinary level) – 3 years Senior Secondary School (Advanced level) – 3 years University Bachelor's degree – 4 years Language: English is the medium of instruction from Primary One (P1) through university. However, there are provisions to use French as a language of instruction in secondary and tertiary education. In addition, French and Swahili are taught as elective or supplemental subjects in public primary and secondary schools. Some private primary and high schools have both Francophone and Anglophone systems which use French or English, respectively, as languages of instruction at any and all grade levels. Students in these schools take either language as an elective or a supplementary subject. Junior Secondary School: Each year, more than 90,000 Rwandan students take the national secondary Education Ordinary Level test in July at the end of Junior Secondary School Form 3 (9th grade) in nine subjects. If failed, a student can retake the third year or decide to join a private school. Senior Secondary School: The majority of Rwandan students attend public boarding schools, many of which are highly competitive. There are also private secondary schools in the country. Students must take a national Secondary Education Advanced Level exam to graduate. In Secondary schools advanced level, students will focus on subject combinations as follows:  
Physics-Chemistry-Mathematics (PCM), Physics-Chemistry-Biology (PCB),  
Math-Chemistry-Biology (MCB), Math-Physics-Geography (MPG), Math-Economics-Geography (MEG), History-Economics-Geography (HEG), English-French-Kinyarwanda (EFK),  
English-Kiswahili-Kinyarwanda (EKK), Math-Physics-Computer Science (MPC),  
History-Economics-Literature (HEL), Math-Computer Science-Economics (MCE),  
Biology-Chemistry-Geography(MCG), Physics-Economics-Math (PEM),  
History-Geography-Literature(HGL) and Literature-Economics-Geography (LEG) In A-Level, students take more courses (English, for example) in addition to the main courses of their combination but these courses will not be examined in the national secondary school exit exam. A secondary school transcript contains a letter or percentage grade for each subject for each of three terms, for the three years of senior secondary school (equivalent to the 10th through 12th grades). Students' Term Reports (Bulletins) contain rank in class for each subject, as well as grades for class work and end-of-term exams. The grading system is difficult: 80-100% is usually an A, a grade rarely awarded. At the end of Senior Secondary School (12th grade), all students take the final national exam in each of three subjects of the combinations, plus entrepreneurship and a general paper. These exams are given nationwide in July each year, but the results are not available until the following March. Grading is exceptionally tough: fewer than 3% of grades are A's, and 30% of students fail any given exam. The grading system is shown on the reverse of the certificate. All courses are graded from A (which means excellent) through F (which means failure) except the general paper which is graded with an S. Also, the S can stand for a subsidiary pass for

other subjects. The letter grades have point values as follows: A (6), B (5), C (4), D (3), E (2), F (0), S (1). The maximum weighted aggregate achieved by a candidate who has excelled in all examinable subjects is sixty (60) while the minimum weighted aggregate achieved by a candidate is nine (9). In order to receive a high school leaving certificate, a student must achieve at least three subsidiary level passes (S). However, admission to most higher education programs in Rwanda requires passes in at least two subjects with a minimum grade of C. Rwandan grading system can be compared with the U.S. system as follows: A = U.S. A; B = U.S. B+; C = U.S. B; D = U.S. C+; E = U.S. C; F = U.S. F; Subsidiary = P. Insufficient and unclassified students are not issued certificate diplomas. U.S. colleges/universities should not admit Rwandan students who have not attained at least a level C in the main subjects. Colleges/universities should require a photocopy of the diploma or Certificate of Education and the transcripts/student report forms for senior four (S4) to senior six (S6). The Certificate of Education bears a signature of the Director General of the National Examination and School Inspection Authority (NESA). For TVET and professional education, passing a practical examination at "A" grade level is mandatory to obtain a passing grade. Higher Education: Rwanda's tertiary institutions enroll over 44,000 students in undergraduate, graduate, certificate, and diploma programs in a full range of academic and professional fields. Public universities in Rwanda merged to form the University of Rwanda (UR) and former universities became colleges under the University of Rwanda: College of Arts and Humanities (Former National University of Rwanda in Butare) College of Business and Economics (Former School of Finance and Banking) College of Science and Technology (Former Kigali Institute of Science and Technology) College of Education (Former Kigali Institute of Education) College of Medicine and Health Sciences (Former Kigali Heath Institute) College of Agriculture, Animal Sciences and Veterinary Medicine (Former Higher Institute of Agriculture and Livestock in Musanze) Nine public polytechnics offer three-year Higher National Diplomas in Education, Technology, Human Health, Animal Health, and Nursing (Advanced Diploma). The Advanced Diploma is not equivalent to a Bachelor's degree, but undergraduate transfer credit can be awarded, as is also the case for Teacher Training Colleges and other tertiary non-degree programs. Several private institutions are also accredited by the Higher Education Council Education Board (HEC) to award Bachelor's degrees. Private institution enrollment totals more than 50,421, a number growing due to increasing numbers of part-time students. A Bachelor's degree is considered the basic academic level to be eligible for the Rwandan professional job market. Rwandan university admission is highly competitive, especially in fields such as medicine, engineering, law, and pharmacy. The quality of education is considered reasonably high, despite lacking material resources. In an effort to attract international enrollment, all Rwandan universities operate on a modular, semester system. Most international students are from neighboring countries where French is dominant and want to adhere to a bilingual system. Rwandans in the United States: Rwanda ranks among the top five countries in East and Southern Africa in terms of sending the highest number of students to the United States and the number increases each year. Over a nine-year period, the number of Rwandan students pursuing education in the United States has increased from 465 during the 2011-2012 school year to 1,311 students in the 2023-2024 school year. Testing: Rwanda has moved to internet-based TOEFL and tests can be done twice a month. The SAT is offered five times a year (October, November, December, May, and June) and the GRE is offered three times a year (October, November, and February). The GMAT is not offered in Rwanda because it is a computer-based test. Students who want to take tests which are not available in Rwanda, or on different dates, often travel to Kampala, Uganda, which has several advanced centers. Although the Embassy encourages students to demonstrate their commitment and competitiveness to pursuing U.S. higher education, we advise taking standardized tests only as warranted, and discourage institutions from requiring TOEFL from students who can adequately demonstrate their English proficiency through other means.
